ACOUSTIC SOUND ABSORBENT CORK

THE NATURAL, SUSTAINABLE AND ECO FRIENDLY ACOUSTIC SOLUTION PROVIDED BY NATURE

Each centimetre of cork has millions of tiny air bubbles which gives it the unique property of providing acoustic and thermal insulation. Cork is not only acoustic but is also highly decorative and provided thermal insulation.

Cork is one of the most sustainable materials on the planet. It comes from the bark of a cork tree which lives for 250 years with the bark regenerating every 9 years .

Designed by nature it offers a unique assortment of designs, textures and colours and digital prints and in addition provides thermal and acoustic insulation and is naturally fire retardant.

Cork is 100% recyclable, dust, dirt and grease repellent, resistant to bacteria and fungus, mould and mildew resistant, chemical and formaldehyde free, easy to clean, water and stain resistant, quick and easy to install, ideal for health care facilities and ideal for asthma and allergy sufferers. It improves internal air quality and has an almost negative carbon footprint.

Cork has an inherent chemical in its cellular structure which makes it impenetrable to liquids and gasses. Being a natural product it induces natural vibrations enhancing a sense of peace and tranquillity and is suited to modern and traditional spaces.
